

POSTE INDUCTION 2 EN 1

COMBO

Professional Induction heater

Ideal for workshops or in the fields that require high-end heat levels.

The **COMBO** induction heaters are also ideal for a wide range of applications: brazing, shrink-fitting, hardening, curing beside straightening pre/post heating, annealing, etc.

In automotive some of the applications are :

- helps removing blocked tyres
- wheel alignment
- workshop equipment on cars

Design: portable desktop

System features include as standard:

- control panel interface with key pad and leds with 5 heat output levels
- power board unit
- Hydraulic radiator group
- Inductor transformer cable (2.0 m)
- foot pedal accessory with cable (2.2 m)
- glass remover accessory with cable (2.2 m)
- heating glove accessory with cable (2.2 m)

ART: IND/GLOVE
HEATING GLOVE

ART: IND/GLASS
GLASS REMOVER

ART - iT COMBO

485x330x405h mm

700x400x500h mm

15 KG

Side Inductor IND5KW/S03 with flow concentrator

Input power 3.5 Kw
Electrical connection IEC60309

230V/2PH+T 50 Hz

16 AMP

Working frequency 15-30 Khz

Duty cycle 9 min*
(*± 5% based on 20°C room temperature @ max power)

2 m Network cable

IP 21 Degree of protection

Main circuit breaker

2lt tank (water & propylene glycol)

Hydraulic liquid cooling system
with heat exchanger & fan
